

# NGAZIBINI NDWANDWA

*Aspiring Cybersecurity Analyst*

Johannesburg, South Africa | 079 683 8074 | ndwandwangazibini7@gmail.com [LinkedIn](#) | [GitHub](#)

---

## PROFESSIONAL SUMMARY

---

Information Technology student at North-West University (graduating 2026) with a growing specialization in cybersecurity and hands-on full-stack development experience. Practiced in Capture the Flag (CTF) challenges and networking fundamentals, currently pursuing CompTIA Security+ certification. Seeking to begin a career as a Cybersecurity Analyst, bringing a practical developer's understanding of how systems are built to the work of securing them.

## EDUCATION

---

### Bachelor of Information Technology

*Expected 2026*

North-West University

## TECHNICAL SKILLS

---

- Programming Languages: C#, C++, Java, Python, HTML
- Databases: MongoDB; relational database design (ER modelling, Crow's Foot notation)
- Security: CompTIA Security+ (in progress); CTF / penetration-testing fundamentals; networking security (Cisco Networking Academy)
- Tools & Practices: Git/GitHub, full-stack web development, version control

## PROJECTS

---

### Cooking Portal System

- Designed and developed a web platform showcasing recipes from different countries
- Built with a MongoDB backend for flexible, scalable recipe data storage
- Applied database design principles to structure recipe, ingredient, and country relationships

### Clothing Shop E-Commerce System

- Developed a full online clothing store, including user registration/login, product browsing by category, cart management, and payment gateway integration
- Built using C# for back-end logic and HTML for the front-end interface

## CERTIFICATIONS

---

- CompTIA Security+ — In Progress, expected completion 2027

## ADDITIONAL EXPERIENCE

---

- Completed multiple Capture the Flag (CTF) challenges on TryHackMe, applying practical skills in penetration testing, vulnerability identification, and security fundamentals
- Completed several courses through the Cisco Networking Academy, building foundational knowledge in networking and network security
- Participant, hackathon — collaborated in a team environment to design and build a solution under time constraints, strengthening problem-solving and rapid development skills
